Self Measurement Form

Natural Waist: This measurement has to be taken from approximately 2" above the trouser waist. This measurement has to be taken firm but not tight.

Hip Measurement: This measurement is taken around the widest part of the seat. This measurement has to be taken easy but not slack.

Length Measurement: This measurement has to be taken from the Natural Waist to the centre of the Knee Cap. Please tell us how tall you are as this will help give us clearer indication of the finished length required.

Chest Measurement: Measure around the chest at the fullest point. Make sure the tape measure is under the arm with one finger separating the measuring tape and the body.

Crown to Cuff: Measure from the crown of the shoulder to the end of the cuff. Alternatively, with the arm folded across the front of the chest this measurement can also be taken from shoulder to cuff end.

Body Length: This measurement has to be taken from the seam at the nape to approximately the point of the hip measurement of the kilt.
